3 PERSONALIZATION

2 ADJUDICATION

4 DOCUMENT DELIVERY

1 ENROLMENT

5 VERIFICATION

TOPPAN
TOPPAN GRAVITY
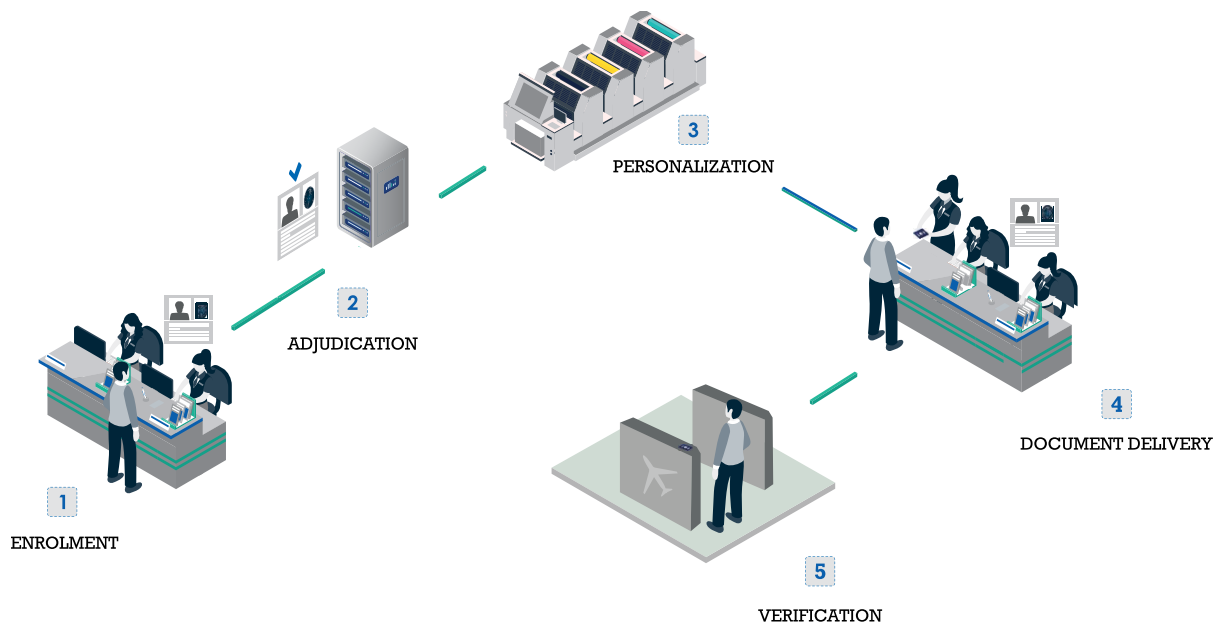

1. ENROLMENT:

Optimizing the flow and capacity at the enrolment site through a graphical pre-enrollment and enlisting accurate biometrics to confirm the uniqueness of the identity.

2. ADJUDICATION:

Comparing the individual's biographical details (biometric and demographic data) with the data in the system and handling suspected duplicates.

3. PERSONALIZATION:

Transfer of sensitive personal biographical data to an ID document through select technology such as laser or printing.

4. DOCUMENT DELIVERY:

Once personalized, the ID document is either mailed to the permanent address of the applicant or picked up at the municipality.

5. VERIFICATION:
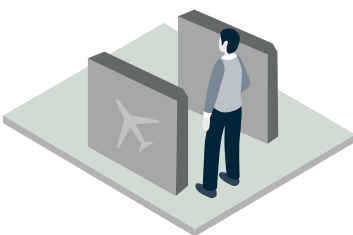

Validation of document authenticity, comparison with Lost and Found or wanted person databases, and verification of document holder identity.

DIGITAL **COVID CERTIFICATE** (DCC) SOLUTION

The current health crisis has shown that outdated, unsecure vaccine management systems and affiliated documents such as the "Yellow Card" needs to be improved and modernized. Across the globe, several health passport & certificate initiatives from isolated Governments, private sectors or organizations have been proposed.

Toppan Gravity's Digital COVID Certificate (DCC) Solution aims at restoring freedom of travel since it allows the lifting of restrictions as entry bans, quarantine obligations, and PCR / RDT testing. People all around the world can easily enter and travel within Europe by simply getting a QR code scanned.

KEY **BENEFITS**

✓ Solution already implemented and running in the EU

✓ Toppan Gravity will support any government to comply with the EU standards, so that your country becomes an official 'third party' member. This means that the Covid Certificate issued by your country will be treated as equivalent the EU DCC

✓ Modular approach, re-use and optimization of existing infrastructure (if possible).

✓ End-to-end solution, including the trust framework, QR code preparation and issuance, upgrade of existing certificate solution to the EU Standards

✓ Mobile and physical credential support
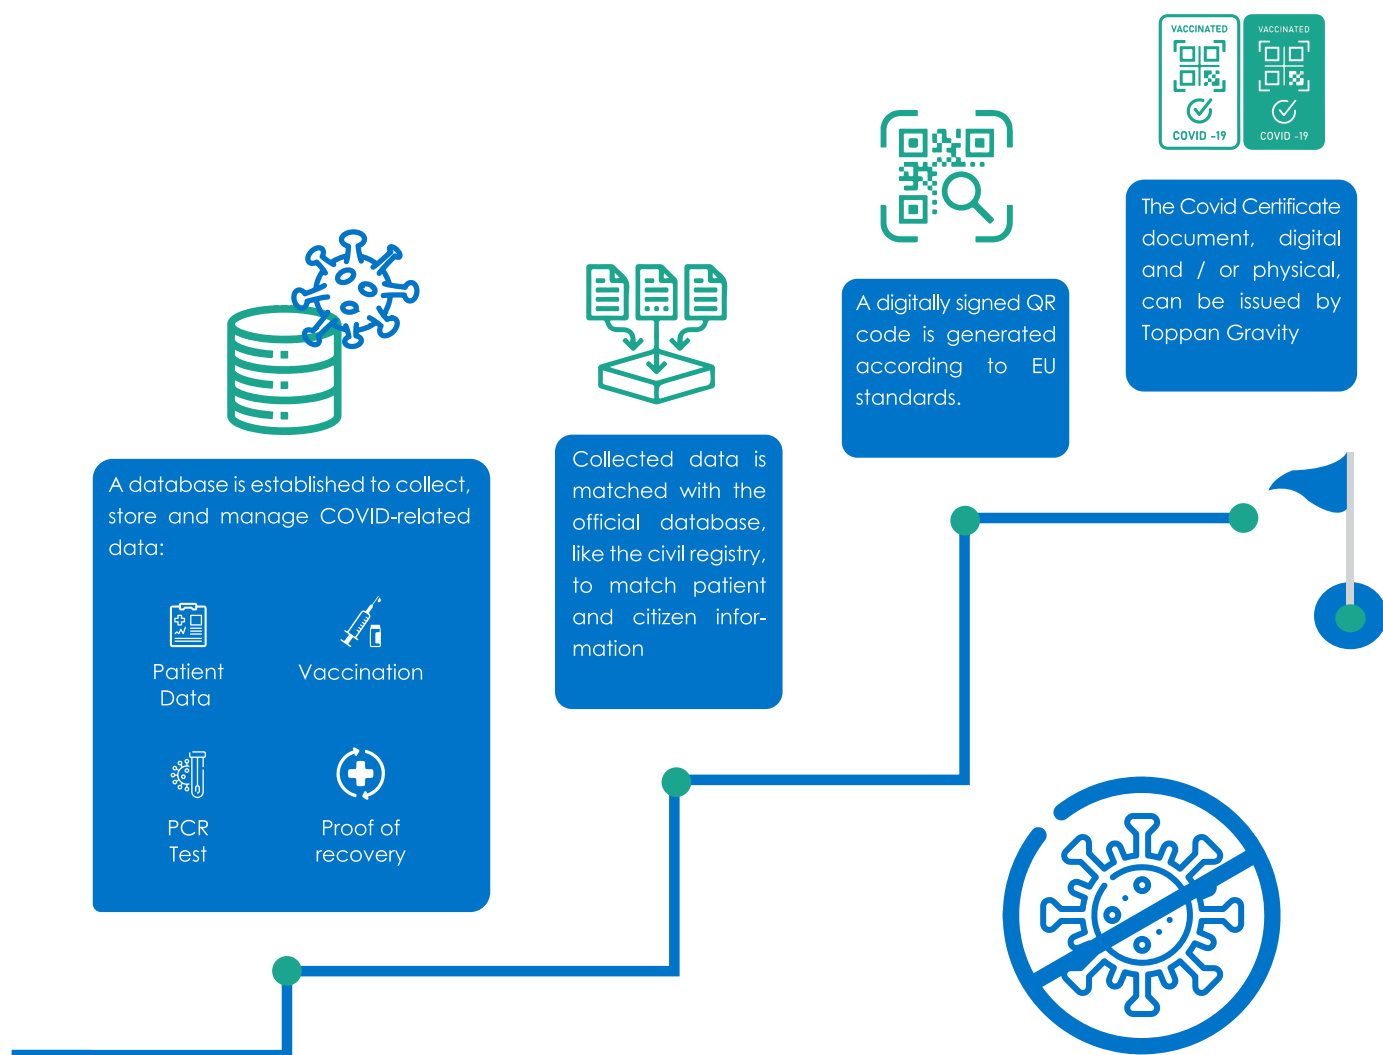

TOPPAN
TOPPAN GRAVITY

The information contained in the QR code of the EU interoperable COVID-19 health certificates is digitally signed, proving its authenticity, and can be verified via the EU Gateway. Its underlying trust framework is an ICAO compliant Public Key Infrastructure (PKI), the core element to digital signature today. Such Infrastructure is already current, like the one applied to travel documents (eIDs and ePassports).

✓ The set-up of your Trust Framework, according to EU regulations, best practices and security requirements
✓ The Third Country EU Digital COVID certificate Equivalence Decision procedure and the connection to a global or local public key directory (EU-gateway)
✓ Installation and management of a Document Signer to sign the COVID certificate
✓ QR code preparation and COVID Certificate issuance via API
✓ Certificate revocation services

Solution Process

A database is established to collect, store and manage COVID-related data:

Patient Data

Vaccination

PCR Test

Proof of recovery

Collected data is matched with the official database, like the civil registry, to match patient and citizen information

A digitally signed QR code is generated according to EU standards.

The Covid Certificate document, digital and / or physical, can be issued by Toppan Gravity

BIOMETRIC CARD **WITHOUT A CHIP**

Shortages in sourcing semiconductor products is affecting the secure credentials sector as well. Many new projects are delayed or cancelled as raw materials, especially the secure IC cannot be sourced, or at a much higher price.

Use Cases:

- Access Control
- Identify Driver
- Certificate Authentication
- Exam Access
- Property deeds
- Secure IBAN

ID CARD WITH A HIGH-DENSITY SECURE QR CODE

Toppan Biometric ID card carries a high-density secure barcode that entails the biometric data of the document holder (portrait and / or Fingerprints).

Our solution supports the most widespread high density QR code formats: Datamatrix, 2D Doc, following ISO / IEC standards for a complete transparency of the solution.

KEY **BENEFITS**

- ✓ **Cost efficient solution**
- ✓ **Fast implementation**
- ✓ **Free of charge verification App**
- ✓ **iOS and Android**
- ✓ **Security by design**
- ✓ **Offline authentication**
- ✓ **Multilingual Support**
- ✓ **GPDR Compliant**

TOPPAN
